1. Metal fence panels (5)
2. Metal stakes (6)

Tools You Will Need

- Rubber mallet or a hammer and block of wood

ASSEMBLY INSTRUCTIONS

1

Insert stake through the 4 eye holes of side A of the fence section and use a rubber mallet drive the stake into the ground until it can go no further. (Alternately use a hammer and a block of wood to protect the stake. Avoid metal pounding on metal as it could remove the protective surface of the stake and cause it to rust, voiding the warranty).

2

Line up the second panel with the first, ensuring that side A of the second panel butts up with side B of the first panel. Drive the stake through all 8 eye holes and into the ground until it can go no further.

3

Repeat for all 5 sections.
